Easy-dose ³	✓	✓	✓	✓	✗

Directions for Use

Dose: 5 mL/100 kg liveweight.

Application: Apply to animals as a single line along the backline ensuring treatment of the whole herd.

Pests Controlled	Rate	Live Body Weight	Critical Comments
Cattle Lice (<i>Bovicola bovis</i>) (<i>Lignognathus vituli</i>) (<i>Haematopinus eurysternus</i>)	5 mL	Up to 100kg	Apply to animals in a race or drainage pen as a single stripe along the backline. Retreat later in the season if reinfestation occurs.
	10mL	101-200kg	
	15mL	201-300kg	
	20mL	301-400kg	
	25mL	401-500kg	
Buffalo Fly (<i>Haematobia irritans exigua</i>) Stable Fly (<i>Stomoxys calcitrans</i>) House Fly (<i>Musca domestica</i>) Biting Midge (<i>Culicoides sp.</i>)	For cattle over 600kg apply 5mL per 100kg liveweight		Apply to the whole herd – retreatment may be necessary.

Deltamax – An important integrated pest management tool for flies

- It is important not to rely on chemicals alone for nuisance fly control. An integrated pest management approach aims to reduce fly populations by controlling their ability to reproduce. Deltamax kills flies through direct contact, so it is important not to wait until fly numbers are high before starting to use the product.
- Proper management of breeding and feeding sites of flies such as manure heaps, grass cuttings and silage stacks
- Make sure drainage is good to avoid contaminated water pooling
- Spread manure to prevent fly larval development
- Always practice good dairy hygiene with regular and thorough washing of hard surfaces and equipment to remove milk and manure contamination
- Promptly treat any wounds on animals
- Create physical barriers that minimise the ability of flies to enter dairy buildings using things like self-shutting doors and mesh screening.

BENEFITS

- ▼ Water based formulation resulting in minimal irritation on cattle and no disruption to milking – easier application and clean-up
- ▼ Controls nuisance flies and lice for up to 8 weeks after treatment
- ▼ For control of synthetic pyrethroid susceptible buffalo fly in cattle
- ▼ Nil meat and milk withholding period when applied to cattle
- ▼ Available in 20L, 5L and 1L pack sizes.

DELTAMAX* QUICK DOSE is **approved for use on horses** for the control of Buffalo Fly (*Haematobia irritans exigua*) for up to 3 weeks and for the control of Stable Fly (*Stomoxys calcitrans*) for up to 1 week.

Available Exclusively through Murray Goulburn Trading.
