

ENDURAMEC HORSE PASTE

ACTIVE CONSTITUENT: 18.7 g/kg IVERMECTIN **7.49 g**

CONTROLS ROUNDWORMS, BOTS AND SUMMER SORES.

Great value, low dose volume, broad spectrum parasite control for horses - controls roundworms bots and summer sores at a great price.

- ENDURAMEC has a wide safety margin. It can be used in horses of all ages including mares at any stage of pregnancy and breeding stallions;
- Effective against Benzimidazole (BZ) resistant worms (small strongyles) - some strains of bloodworms have become resistant to BZ products, ENDURAMEC can control BZ resistant worms;
- Low dose volume – ENDURAMEC Horse Paste is easy to administer and stays in the mouth;
- Ergonomic syringe for quick administration, fits smaller hands.
- Syringe volume: 7.49g.

DOSE RATE

The contents of one syringe will treat one horse of 700kg bodyweight. Each weight marking on the syringe plunger will deliver 1.07g of paste which is sufficient to treat 100kg bodyweight.
